

PLANETARY HEALTH CORRELATIONS

Individual Planets

SUN:

- Core life energy and foundational vigor
- Cardiac system and heart functioning
- Central essence of physical wellness

MOON:

- Physical fluids throughout the body / Material foundation of physical existence
- Primitive brain operations and unconscious physiological regulation
- Reproductive organs and processes in females

MERCURY:

- Central and peripheral neural pathways, especially cerebral cortex and spinal cord
- Perceptual organs as information conduits and communication channels
- Cognitive processing sensitivity and nervous reactivity

VENUS:

- Endocrine network and hormonal balance / Possibly renal system functionality
- Feminine biological characteristics and processes
- Rest-and-digest nerve functions and limbic structures

MARS:

- Muscular tissues and strength expression
- Stimulants triggering epinephrine release
- Masculine physiological traits / Tissue swelling and heat responses

JUPITER:

- Digestive tract and hepatic functions
- Growth processes, nutrient processing, and cellular building
- Tension release in muscular systems / Successful therapeutic interventions

SATURN:

- Bone structure and skeletal framework
- Waste removal and excretory functions
- Chronological deterioration and aging processes

URANUS:

- Bioelectrical currents and neural signaling
- Alertness mechanisms and attention shifting

- Potentially involuntary body regulation, particularly stress responses

NEPTUNE:

- Deterioration, decline, and diminishing function
- Tissue shrinkage and strength reduction
- Energy depletion and vitality loss

PLUTO:

- Mental influence on bodily conditions through deep psychological mechanisms
- Cellular multiplication and tissue renewal / Recuperative capabilities
- Connection to genesis and reproductive origins

Planetary Pairs

SUN-MOON:

- Procreative elements (generative fluid and germinal cell)
- Cardiac relationship to bodily liquids / Possibly fluid accumulation around heart
- Visual organs and sight functions
- Interaction between aware mind and submerged thought processes

SUN-MERCURY:

- Overall condition of nerve pathways and signaling
- Spinal connections, brain functioning, and heart nerve clusters
- Mental overstimulation depleting core energy
- Male adolescent development and hormonal awakening

SUN-VENUS:

- Female generative structures (particularly egg-producing glands)
- Vitality potential of female reproductive cells
- Hormone impact on fundamental health and energy / Heart-kidney relationship
- Egg follicle development and function

SUN-MARS:

- Male reproductive organs and generative fluids
- Physical power, energy reserves, muscle development and condition
- Heightened metabolic function / Heat and inflammatory responses
- Heart muscle tissue and cardiac strength
- Emergency energy mobilization systems

SUN-JUPITER:

- Life force and physical resilience
- Heart health and cardiac performance
- Constructive biological processes and nutrient integration / Cell development

- Elevated fat compounds or enzyme activity in blood
- Effective recovery mechanisms and health restoration

SUN-SATURN:

- Reduced metabolic activity or restricted vitality flow
- Time's effect on physical form / Age-related deterioration
- Cardiac disease processes and circulation blockages
- Skeletal framework and structural support issues / Joint inflammation
- Crystalline deposits and blockage conditions / Genetic predispositions

SUN-URANUS:

- Heart and lung rhythmic functions
- Cardiac electrical conduction pathways
- Possible circulatory emergencies or interruptions
- Autonomic regulation disturbances / Mental stability challenges

SUN-NEPTUNE:

- Diminished life force and energy reserves
- Muscular atrophy and strength reduction, particularly cardiac
- Fluid retention or circulatory excess / Blood composition disorders
- Recovery periods and healing processes

SUN-PLUTO:

- Dramatic swings in vitality and life energy
- Unregulated cell growth and division / Astonishing recovery or unusual conditions
- Gender identity disconnection or significant biological misalignment
- Mortality awareness or life-threatening experiences

MOON-MERCURY:

- Neural sensitivity issues, anxiety conditions, or environmental reactivity
- Cerebrospinal fluid and brain moisture
- Brainwave patterns and neural oscillations
- Female maturation and developmental transition

MOON-VENUS:

- Systemic hormone production and regulation
- Feminine reproductive capacity and biological functions
- Menstrual cycles and related secretions
- Lower brain and emotional center coordination

MOON-MARS:

- Hemorrhage, temperature elevation, tissue irritation, pathogenic invasion
- Fluid loss and dehydration states / Tissue expansion and blood engorgement

- Instinctual reproductive responses / Potentially self-attacking immune responses
- Overactive thyroid conditions with metabolic acceleration

MOON-JUPITER:

- Food processing, absorption, and nourishment
- Digestive secretions and enzymes
- Healthy female generative system function
- Unconscious influences in healing processes

MOON-SATURN:

- Lowered physiological and emotional responsiveness
- Reproductive and birthing difficulties
- Digestive, urinary and elimination dysfunctions
- Mineral utilization disruptions / Typically unfavorable for physical wellness
- Inherited medical tendencies

MOON-URANUS:

- Unpredictable menstrual patterns
- Automatic bodily regulation, especially stress response systems
- Bioelectrical disruptions or irregularities
- Mental tension, disorientation, or reality disconnection

MOON-NEPTUNE:

- Body liquid imbalances or circulation issues
- Blood contaminants or impurities
- Abnormal fluid accumulation in tissues
- Harmful unconscious patterns affecting mental clarity, potentially causing worry, melancholy or uncertainty

MOON-PLUTO:

- Disrupted menstrual cycles, fertilization processes, or pregnancy losses
- Extremely unusual or rare physical conditions
- Deep psychological impact of experiences / Mental upheavals or transformative episodes
- Intensity that can either damage or profoundly heal

MERCURY-VENUS:

- Brain-hormone system reciprocal influences
- Mental state effects on chemical balance
- Hypothalamic functions and regulation
- Nerve relaxation mechanisms / Developmental timing delays

MERCURY-MARS:

- Movement-controlling nerve fibers

- Neural excitation, irritation, or inflammatory responses
- Blood leakage in brain tissues
- Vertebral nerve irritation or pain signaling issues
- Crisis detection and heightened sensory awareness

MERCURY-JUPITER:

- Neural-digestive system relationship
- Optimal neural nutrition requirements
- Recovery-oriented thought patterns
- Well-informed medical approaches

MERCURY-SATURN:

- Neural transmission impediments
- Time's impact on brain function and nerve health
- Restricted physical mobility / Thought fixation or emotional darkness

MERCURY-URANUS:

- Nerve impulse transmission and electrical brain activity
- Neural excitement or disorganization
- Spinal pathways for positional awareness and body coordination
- Attention shifting mechanisms / Severe headache conditions

MERCURY-NEPTUNE:

- Neural deterioration, weakening, or functional loss
- Sensory input reduction or processing failure
- Reality perception disturbances
- Brain-based psychological disorders

MERCURY-PLUTO:

- Neural exhaustion and system overload
- Unusual thought patterns or nerve responses
- Potentially irregular cerebral structures or nerve tissue regeneration
- Transformative psychological experiences

VENUS-MARS:

- Generative and sexual processes
- Immune gland and adrenal functioning
- Hormonal inflammation and immune dysregulation
- Potentially renal infections or iron utilization
- Vein enlargement and circulatory issues

VENUS-JUPITER:

- Digestive hormone production and regulation

- Pancreatic function and liver-kidney chemical exchange
- Well-functioning female hormone systems / Physical equilibrium and relaxation
- General contentment and physical satisfaction
- Possible heavy metal toxicity

VENUS-SATURN:

- Glandular dysfunction or hormonal disruption
- Thyroid, kidney, or glucose management issues
- Mineral metabolism and utilization
- Cardiac disorders or developmental heart issues
- Female reproductive complications
- Bowel movement difficulties / Hormone resistance phenomena
- Potential metal poisoning

VENUS-URANUS:

- Hormonal system irregularities
- Unpredictable female reproductive functions
- Disrupted physiological balance mechanisms

VENUS-NEPTUNE:

- Diminished or irregular hormonal activity
- Tissue fluid accumulation
- Emotional brain structures / Pineal secretions
- Kidney or thyroid function anomalies

VENUS-PLUTO:

- Major hormonal system transitions
- Chemical release into bloodstream / Menarche or menopause
- Traumatic impact disturbing bodily balance
- Glandular disease processes / Fertilization events

MARS-JUPITER:

- Robust muscle development and physical energy
- Vitality and strength expression / Healthy male reproductive capability
- Enhanced delivery and birthing power
- Potential digestive inflammation, stomach irritation, or intestinal ulceration

MARS-SATURN:

- Muscle-bone interface and structural support
- Bone marrow and cell production / Joint inflammation and degenerative conditions
- Tissue damage, accidents, or organ trauma
- Homeostatic disruption and tissue death
- Age-related deterioration processes

MARS-URANUS:

- Heart muscle electrical activation
- Trauma, surgical intervention, or hemorrhage
- Emergency physiological response and adrenal surge
- Reproductive system contractions and climax mechanisms

MARS-NEPTUNE:

- Muscle weakening, atrophy, or movement impairment
- Reduced sexual capacity or drive
- Sensitivity to pathogens, chemicals, or allergens
- Respiratory inflammation or constriction
- Potentially painful fluid retention

MARS-PLUTO:

- Cellular inflammatory processes
- Tissue breakdown mechanisms / Energy generation acceleration
- Overuse or strain injuries / Pressure-related conditions
- Revolutionary healing approaches / Potentially cancerous developments

JUPITER-SATURN:

- Integration-elimination equilibrium
- Digestive disorders and liver dysfunction
- Skeletal health and joint integrity
- Conservative treatment approaches / Time-dependent recovery

JUPITER-URANUS:

- Automatic nerve impact on nutrition and processing
- Digestive wave rhythm and peristaltic function
- Cutting-edge medical interventions / Technological healing approaches

JUPITER-NEPTUNE:

- Deep abdominal muscle relaxation
- Digestive organ atrophy or dysfunction
- Liver toxicity or damage / Excessive fluid retention
- Eating disruptions and stomach emptying issues
- Treatment mistakes or diagnostic errors

JUPITER-PLUTO:

- Heightened cell proliferation / Potentially disease or remarkable healing
- Exceptionally robust health potential
- Tissue regeneration capabilities / Successful medical transfer procedures
- Environmental impact on digestive processes

SATURN-URANUS:

- Physical rhythm suppression
- Bioelectrical disruption / Heart congestion or circulation blockage
- Muscle cramping and spasms / Elimination difficulties
- Bone injuries or limb loss
- Concentration challenges / Attention deficits
- Irregular breathing patterns

SATURN-NEPTUNE:

- Persistent debilitating conditions
- Mental darkness or ongoing pain syndromes
- Movement limitations or functional paralysis
- Skeletal density reduction and bone weakening

SATURN-PLUTO:

- Skeletal damage or deformity / Fractures and breaks
- Elimination blockages and colon issues
- Age-related transformations / Mineral deposit accumulation
- Fixation and thought obsession
- Underdeveloped organ structures

URANUS-NEPTUNE:

- Altered awareness states and consciousness shifts
- Automatic nervous system conflicts and disruptions
- Cardiac failure and circulatory collapse

URANUS-PLUTO:

- Electrical system dysfunction and disruption
- Genetic alterations and DNA changes
- Unprecedented or extremely rare medical conditions

NEPTUNE-PLUTO:

- Mysterious conditions defying diagnosis
- Genetic intervention as therapeutic approach
